

Trigon theme

A modern, elegant and versatile
theme for Beamer

Thomas Lambert

March 19, 2022

Overview

1. Introduction

2. Layout

3. Elements

4. Conclusion

The background of the slide is composed of two large, overlapping geometric shapes. A teal-colored shape occupies the top-left corner, while a light gray shape occupies the bottom-left corner. The rest of the slide is white. The word "Introduction" is centered in the white area.

Introduction

Introduction

A short introduction to Trigon

TRIGON is a modern, elegant and versatile theme for Beamer, inspired by the METROPOLIS theme from Matthias Vogelgesang.

TRIGON comes with lots of nice extra features

- ▶ Multiple style variations for title, section and normal slides
- ▶ Simple customization of theme colors
- ▶ Lots of convenient options to tweak the design

Layout

Layout

Layout variations

The general style for the title, section and regular frames can be changed easily with simple options. Here are some examples for the title page

plain

style1

style2 (default)

Layout

Fonts

This theme is using *Source Sans Pro* font for all elements by default. This can be disabled by providing the option `usesourcefonts=false`.

Emphasis can be added by using **bold** typeface, *italic*, **alert** or **simple colors**.

Equations are typesetted with this font as well

$$F(x|\mu, s) = \int_{-\infty}^x s^{-1} \left(1 + e^{-\frac{v-\mu}{s}}\right)^{-2} e^{-\frac{v-\mu}{s}} dv = \frac{1}{1 + e^{-\frac{x-\mu}{s}}}$$

Elements

Elements

Charts

Use the theme color `tPrim`, `tSec`, `tGrey` and `tAccent` to have charts directly fit the main theme of presentation.

- ▶ Easy variants using `color!x` to lighten or darken the colors

Elements

Lists

Items

- ▶ Item 1
 - ▶ Subitem 1
 - ▶ Subitem 2
- ▶ Item 2
- ▶ Item 3

Enumerations

1. The Fellowship of the Ring,
2. The Two Towers,
3. The Return of the King.

Descriptions

Trigon Modern.
Default Outdated.

Elements

Figures

Figure 2: Rotated triangles from texample.net.

Elements

Tables

Table 1: A nice table example

	Velocity	Angle	Vertical force
	U	α	F_z
	[m/s]	[°]	[N]
2D simulation	9	2	9.23
3D simulation	10.0	3	15.039
Experiment A	11.31	2.5	13.2
Experiment B	11.26	2.7	12.6
Experiment C	11.33	2.47	13.6

Elements

Blocks

Regular block

Just a regular block

Alert block

Some important thing

Example block

No difference with regular block to avoid excessive distraction

Elements

Frame footer

TRIGON defines a custom beamer template to add a text to the footer. It can be set via

```
\setbeamertemplate{frame footer}{My custom footer}
```

References

Some references to showcase `[allowframebreaks]` [4, 2, 5, 1, 3]

The background of the slide is composed of two large, overlapping geometric shapes. A teal-colored shape occupies the top-left corner, while a light beige shape occupies the bottom-left corner. The rest of the slide is white. The word "Conclusion" is centered in the white area.

Conclusion

Summary

Get the source of this theme and the demo presentation from

`gitlab.com/thlamb/beamertheme-trigon`

As for METROPOLIS, **TRIGON** is licensed under a Creative Commons Attribution-ShareAlike 4.0 International License.

Backup slides

Sometimes, it is useful to add slides at the end of your presentation to refer to during audience questions.

The best way to do this is to include the `appendixnumberbeamer` package in your preamble and call `\appendix` before your backup slides.

TRIGON will automatically turn off slide numbering and progress bars for slides in the appendix.
